Validate your networking skills and advance your career with the Professional Cloud Network Engineer certification. Certification can help you gain credibility and give you an advantage in today's highly competitive market.

The Professional Cloud Network Engineer certification is for networking professionals who want to demonstrate their proficiency in implementing and managing network architectures in Google Cloud Platform. It is recommended that this individual has at least 3 years of networking experience and 1 year of hands-on experience working with Google Cloud.

The exam will assess your ability to:

- Design, Plan, and Prototype a Google Cloud Network
- Implement a Google Cloud Virtual Public Cloud (VPC)
- Configure Network Services
- Implement Hybrid Interconnectivity
- Implement Network Security

Visit the Google Cloud Certification website for more information and to register. Good luck!
